Wallerdsking the 1890 & 1840 Alabama Censuses

How to read the tabulation

Example:

First Last Name 123000100010-21000100000-04 00 00 Page # Township

(of head of household) White Males -White Females-Slaves, Free Colored, Foreign not naturalized

The first string of 12 numbers represents the number of white males living in that household in the following age categories: Under 5/5-10/10-15/15-20/20-30/30-40/40-50/50-60/60-70/70-80/80-90/90-100

The second string of 11 numbers represents the number of white females living in that household in the same age categories, except there were no women in the age 90–100 category among the "Alfords," so we are not including that category.

The third string of 6 numbers in groups of 2 represents the number of other household members: the first 2 numbers are the number of slaves; the second 2 numbers are the number of "free colored"; the third 2 numbers are the number of unnaturalized foreign-born people. The "Alfords" in Alabama in 1830 and 1840 had no members in the last 2 categories.

The household in the example above was made up of a man between the ages of 40 and 50, a woman between the ages of 30 and 40 (probably husband and wife); 3 boys ages 10-15; 2 boys and 1 girl ages 5-10; 1 boy under age 5; and one man age 80-90. (Because no relationships are given in censuses before 1850, we cannot be certain that all the people in this household are related.)

This household also has 4 slaves. In the tabulation below, ages of the slaves are shown divided into 5 age groupings.

"Alfords" found in the 1830 Alabama Census
