

# **AAFA Census Data**

## ***"Alfords" in the 1860 GEORGIA Census***

**Alicia Roundy Houston AAFA #0001 & the AAFA Census Team**

*The census reports are products of the AAFA census team. The initial list of names to be extracted was prepared from published census indexes and, in some cases, supplemented by unindexed entries. A commercial extraction served as the foundation, then the microfilm was revisited for completeness and accuracy.*

*The following data is not intended to reflect either the "true" facts or what descendant families believe to be the facts. It is also not guaranteed to be without error. Nevertheless, every attempt has been made to provide a complete and faithful representation of the information recorded on the original enumeration forms.*

*The order of the information in the two line family header: the name of the post office or enumeration district, City or Township, and county. On the 2nd line: census page number, census dwelling or house number, census family number, and the enumeration date.*

*The categories on each line appear in the following order: name, sex, age in years or months (two columns), color (assumed to be white unless shown otherwise), birthplace, \*MSR, property, and occupation. In the case of infants, the age is expressed in months, in which case the year column is left blank.*

*\*Data collected in 1860 included information on marriage, school attendance and literacy:*

*M = married within the year*

*S = attended school within the year*

*R = can't read or write*

*Birthplace is shown with the approved postal abbreviations for states in the U.S. Foreign places were abbreviated as follows: GM = Germany, UN = unknown, NR = No Record or Not Recorded*

*Arranged by county, page, and dwelling as canvassed.*

*For most subjects the age is expressed in years immediately after the sex entry. In some cases - particularly with infants - the age is expressed in months in which case the age column is blank. When the age is expressed in months it is in the next seldom used column immediately after age.*

*Color is shown after the age data. It is assumed to be white unless otherwise specified.*

*The association acknowledges the efforts of Bill Michiner, Gil Alford, Rod Bush and Peggy Alford Schuster in the preparation of this report.*
